

Features

- 3 line system
- Intrinsically safe 24V signal system
- Max. impulse current 20 kA(8/20 µs)
- plug in gold plating
- 12.4 mm,hot plugging
- 35 mm rail installation

Description

This SPD limits induced transients of different origin (lightning stroke, switching impulse, etc.). This is achieved by diverting the transient current to ground and limiting the signal line voltage to a safe level for the duration of the surge.

It can be applied to 3 or 4 transmitter , RS-232 ect.
