

| Features                                      |  | Parameter                                     |   |
|---|--|---|---|
| ■ A base part and a plug-in protection module |  | Technology                                    | Gap&MOV                                 |
| ■ MOV and Spark Gap technology                |  | Nominal voltage Un                            | 400/690Vac                              |
| ■ Capable of protecting terminal equipment    |  | Max. continuous operating voltage Uc          | 440 Vac                                 |
| ■ Status indicator                            |  | Nominal discharge current In(8/20 μs)         | 25 kA                                   |
| ■ 35 mm rail installation                     |  | Lightning impulse current limp(10/350 μs)     | 25 kA                                   |
|   |  | Follow current extinguishing capability (Ifi) | Infinite                                |
|   |  | Voltage protection level Up                   | 2.4 kV                                  |
|   |  | Voltage protection level(5kA) Up              | 2.0 kV                                  |
|   |  | Cross-sectional area (min.)                   | 1.5 mm <sup>2</sup> stranded / flexible |
|   |  | Cross-sectional area (max.)                   | 25 mm <sup>2</sup> stranded / flexible  |
|   |  | Response time Ta                              | ≤ 100 ns                                |
|   |  | Max. overcurrent protection                   | ≤ 250 A gL/gG                           |
|   |  | Remote communication function                 | P-FL-440/25xPR                          |
|   |  | Switching capacity                            | Max:125 VAC/1A,Min:5 V/1mA              |
|   |  | Operating state / fault indication            | Green / red                             |
|   |  | General parameters                            |   |
|   |  | Operating temperature range                   | -40 °C ~ +85 °C                         |
|   |  | Installtion                                   | 35 mm DIN                               |
|   |  | Enclosure dimensions (HxWxD)                  | 90 mm x 36 mm x 66 mm                   |
|   |  | Location category                             | Indoor only                             |
|   |  | Enclosure material                            | Thermoplastic                           |
|   |  | Flame retardant grade(UL94)                   | V0                                      |
|   |  | Protection degree                             | IP20                                    |
|   |  | Standards                                     | IEC 61643-11/ EN 61643-11               |
|   |  | Power system                                  | single-phase(TN、 TT) AC system          |

交流电源(T1)
