

# AI (loop powered) Isolated Barrier

## NPEXA-CM31L

Single input, single output

## NPEXA-CM3D11L

Double inputs, double outputs

Input: 4 ~ 20 mA

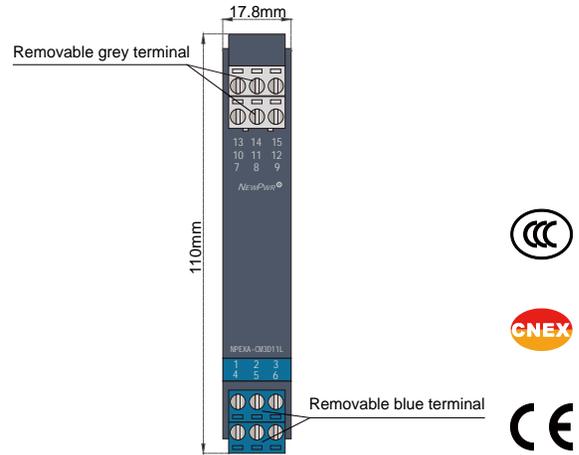

Output: 4 ~ 20 mA

Analog input isolated barrier, it provides transmitters with power in the hazardous area and transfers 4~20mA signals from a hazardous area to a safe area. It allows transmission of HART communication signals. The input and output is galvanically isolated from each other.
